### Are you looking for a boiler for your new house or do you need to replace your present boiler?

In both cases you will be able to choose between hundreds of central heating boilers and find the one best adapted to your home, your installation and your climate.

*The on-line calculation tool will be available from May 1, 2010.*

### Are you end consumer, architect, installer or just curious?

Visit the **charge-free** website now to check how much you may save by replacing your appliance.
